Application Date

Community Reinvestment Areas (CRA) are areas of land in which property owners can receive tax incentives for investing in real property improvements. This program benefits property owners who renovate existing or construct new buildings.

Residential, commercial and industrial projects are eligible. Residential (2 units or less) remodeling or new construction of \$2,500 or more may receive a 50% real property exemption of the improvements only for 5 years.

The application and abatement process for residential projects differs from commercial and industrial projects. If a project involves the renovation or construction of residential buildings, the work is completed prior to making application for the tax incentives. Once completed and the application is filled out, the designated Housing Officer will inspect the improvements to assure that they meet the abating criteria. If approved, the local school district is notified and the application is certified to the county auditor. The abatement becomes affective for the tax year following the year in which it was certified to the county auditor.

Commercial, industrial and residential projects greater than two units involve a negotiated agreement that must be in place prior to starting a project. The incentive levels and terms of the agreement will be negotiated, and there is notification to the affected school district.
